

European Day of Languages – 31.02.2018

Our project is related to the European Day of Languages celebration. It consists of special activities to do not only on the celebration day but also all year round and encourage our students to know the linguistic and cultural diversity in Europe.

1. To celebrate the European Day of Languages on 26th September
2. To make a video recording about the students' schools and the activities that they will have prepared for that day.
3. To present their country to their partners
4. To use technological tools and applications that help them to do their activities
5. To write and send letters
6. To encourage our students to work in groups and collaborate.
