

Wordobots - 18.08.2019

We will teach our students fifteen new words. We will choose those words according to our units every month and help them use web tools or sometimes create posters, play games.

First, in September we will design a big robot on the wall to use it until June and in October we will start teaching new words. Words are all up to you depends on your units and the ages of your students. When they learn the words given, they will get an accessory at the end of the month.

"Dear Students! Your wordobot is so hungry! Feed it monthly to complete all missing parts!"
